HERCULES MOWER AND FERN CUTTER

Its machine has been specially designed for the Colonies and other new countries, for cutting strong thistles, fir and light growth on rough land, and has been most successful in Australia and South America. It has very high wheels and is of great strength combined with lightness in draught.

The cutting apparatus consists of 2 sets of knives, one set fixed to the Bar in place of the Fingers, and the other driven by the Crank plate and connecting Rod in the usual way.

The unanimous verdict of all who have worked this machine is that it is the

"Most useful and economical implement on the estancia."
